

Vikram Puar

Pebble Beach, CA | Vikramp@bu.edu | <https://www.linkedin.com/in/vikram-puar/>

EDUCATION

Boston University | *Bachelors of Science | Biomedical Engineering* Boston, MA | 2023-2027

- Gpa 3.64/4.00 (Dean's List)
- Relevant Courses: Calculus 1-4, Electrical Circuits, Cell Biology, Biomedical Signals & Controls

EXPERIENCE

Neurovascular Imaging Laboratory, Boston University Boston, MA | May 2025 – Present

Undergraduate Research Assistant

- Used AI tools to perform data analysis using MATLAB, developing code to improve analysis efficiency.
- Received grant for research investigating in-vivo oxygen delivery in Alzheimer's mice during sleep.
- Automated data analysis, reducing total data processing time from 1 hour to <15 minutes.

Active Site

Cambridge, MA | June 2026 – August 2026

Summer Research Technician

- Executed cell culture, PCR, extraction, and transfection workflows independently from start to finish
- Designed and validated primers for Golden Gate assembly, site-directed mutagenesis, and reverse transcription, supporting precise plasmid construction, targeted mutagenesis, and cDNA synthesis.

Houghton Chemical Corporation

Boston, MA | April 2026 – June 2026

Operations and Engineering Intern

- Conducted quality control analysis of glycol samples for HVAC systems using reserve alkalinity tests and gas chromatography.
- Researched competitor products and prepared comparative analysis reports.

Intro to Engineering Teaching Assistant

Boston, MA | September 2026 – Present

- Guide students during office hours and lecture on skills such as technical drawings, CAD, 3D printing, Arduino circuit design, and other basic fabrication skills.

Projects

Autoinjector Development | Senior Design Project

Sep 2026 – Present

- Design and prototype an autoinjector, translating user needs into measurable design specifications
- Collaborate closely with teammates, dividing design, prototyping, and testing work to meet milestones
- Build consensus on design trade-offs and communicate team progress to faculty advisors

Gait Tracking Wearable

December 2024

- Designed and built a clinical gait-tracking device as a 4-person team during a semester-long class.
- Utilized Arduino, breadboards, force-sensitive resistors, and motors to track patient gait patterns.

Skills and Activities

Technical: MATLAB, Python, Solidworks, LabView, Design Fabrication.

Golf: Compete in tournaments as a member of the BU Club golf team | Single-Digit Handicap

VP of Engagement | Kappa Theta Pi Technology Fraternity

Jan 2026 – May 2026

- Planned events for as many 120 people to foster both student and alumni networking and relations.
